Subject: RE: Timing question

For the morning report, sometime during the night is fine. However, we still need some updates during the day, before 1300. Not necessarily a complete update, but a few bullets, ...hopefully.

Subject: Timing question

I am trying to develop a plan to get detailed (who, what, when, where, why and how many) information from the field that I can report in a timely manner. So in developing my plan, I need to know what you do with my situation report and when. Basically when do you take the information from my sit rep... at night or early in the morning. It will influence how I do this process. I am being told by OPS that I will get limited info from FOBS and I agree in that that unless they are with every team (which is what David said on that first Sunday) my best use of resources would be have someone who goes through 214B's and gets detailed information there, but the issue with that is it would be late until I got that information. Please let me know your thoughts... I know you are doing your best to keep the machine from eating us, and I am trying to improve this process as well as we go forward. Call me if you have questions... best is between 1430 and 1600 as I have a 1400 meeting and after 1600 we go hard into the IAP and then the Sit Report.

Humming along,
Matt Loesel
